- Realise efficiencies through standardised proven-practice business processes
- Reduce implementation risk and project timeframes
- Accelerate realisation of benefits and return on investment

TECHNOLOGYONE'S
STRONG PARTNERSHIPS IN
GOVERNMENT ALLOW
US TO WORK WITH OUR
CUSTOMERS TO DELIVER
SOLUTIONS THAT
KEEP PACE WITH
CHANGING EXPECTATIONS,
LEGISLATION AND
EMERGING SOCIAL
TRENDS.

GOVERNMENT

Government is a multi-faceted sector which operates in a demanding and ever-changing environment. Governments are under increasing pressure worldwide to improve outcomes and increase outputs, while simultaneously improving efficiencies and effectiveness.

Managing the complexities of a dispersed organisation with this mandate is a challenging task. Government organisations need a reliable, accountable and responsive solutions partner that understands and can deliver on their unique requirements.

TechnologyOne offers government organisations a tailored software solution and services offering via OneGovernment, which represents TechnologyOne's extensive experience with Government, as well as significant ongoing research into the requirements of the sector.

WHAT IS ONE GOVERNMENT?

OneGovernment provides government organisations with a streamlined proven practice software solution and services offering, leveraging a best-in-class methodology to reduce implementation risk and accelerate realisation of value.

OneGovernment supports various government business processes, 'out-of-the-box', enabling government organisations to realise efficiencies by utilising standardised, proven practice business processes as a starting point for their own organisational requirements.

Implementation days are not absorbed in system configuration activities required to support processes common to all government organisations, and are redeployed to focus on high value activities. In this way, the solution has significantly improved implementation outcomes and reduced project timeframes for a number of government organisations.

HOW WAS ONE GOVERNMENT DEVELOPED?

TechnologyOne has had a solution footprint in government for more than 20 years, and boasts more than 130 government customers throughout the Asia Pacific region and the United Kingdom. OneGovernment was developed by TechnologyOne through close collaboration with these customers, as well as with a range of other government stakeholders.

Our Government Solutions team works closely with the sector to stay abreast of current requirements and emerging trends to ensure OneGovernment continues to represent proven practice and offer a low-risk approach to an enterprise system implementation.

OneGovernment is a proven, scalable software solution with the flexibility to adapt to the demands of government. It is flexible enough to adapt to reform and legislative change, without an ongoing reliance on third party consultants.

WHAT DOES ONE GOVERNMENT DELIVER?

World-Class Financial Management

- Automate management, statutory, and central agency reporting in accordance with published government templates
- Improve efficiencies and reduce processing times via intuitive workflows, alerts and notifications
- Benefit from flexible program, output and outcome costing
- Achieve simultaneous cash and accrual accounting
- Devolve easy-to-use government driver-based budgeting and forecasting tools to responsibility centres
- Manage organisational travel and credit card expenditure, ensuring compliance to agency policies

Powerful Procurement and Contract Management

- Centralise administration of all contracts and agreements
- Maintain a visible audit trail including a historical view of all procurement processes
- Automate traditionally manual tasks such as the monitoring of key dates and expirations to minimise administrative burden
- Manage supplier compliance to contract conditions, including close-out vendor evaluations

ONE GOVERNMENT OFFERS ONE
COMPREHENSIVE SOLUTION
WITH ONE INTERFACE AND
ONE DATABASE, DESIGNED TO
DRIVE INNOVATION, IMPROVE
OPERATIONAL EFFICIENCIES
AND INTRODUCE MEASURABLE
PROCESS IMPROVEMENT.

Efficient Payroll Management

- Seamlessly manage payroll processes with tight integration to the general ledger, allowing for an accurate view of payroll expenditure across the whole organisation
- Automate superannuation processing, and easily track and report your organisation's super contributions to employees
- Streamline leave administration and provide flexibility in the handling of multiple leave types
- Utilise electronic workflow to manage timesheet and leave approvals

- Provide employee self-service, and allow employees to monitor payroll and leave entitlement information online, at any time

Better Project Visibility

- Easily access information about programs and sub-programs, or individual projects
- Ensure management has a clear understanding of the progress and status of all projects
- Identify project expenditure overruns to enable appropriate action
- Streamline the project budgeting process, including automating the assessment of proposed funding requests

Real-Time Business Intelligence

- Proactively push information across your organisation for greater effectiveness
- Gain visibility into business-critical information via real-time management dashboards
- Monitor your organisation to ensure a process of continuous improvement

LOW RISK. VALUE FOR MONEY. RAPID ROI.

TechnologyOne's shared industry intellectual property represents extensive market experience and ongoing research into government requirements.

- Achieve the lowest possible total-cost-of-ownership with tested and robust proven practice business processes
- Minimise implementation risk by using a highly structured implementation approach
- Minimise disruption to 'business as usual' by employing a more efficient implementation process
- Redeploy implementation days and focus to high value-added activities
- Enable growth through needs-based modular deployment

VALUE-ADDED SERVICES

Governments not only rely on TechnologyOne to deliver best-in-class software solutions, but also for our significant experience and value-added implementation services, including scoping research, training, data conversion, account management, and project management.

When you invest in a TechnologyOne solution, you benefit from a direct relationship with us every step of the way. We develop, market, sell, implement and support our own solutions. We do not sell our solutions through resellers, nor do we use third party organisations to implement our solutions. This approach holds us accountable to our customers, whether your focus is on business needs, the underlying technology, on time, on budget implementations, or excellence in support and customer services.

About TechnologyOne

TechnologyOne (ASX:TNE) is a leading enterprise software solutions provider. For more than 20 years we have been providing deeply integrated software solutions for business, government, financial services, health and community, education and utilities organisations. Tens of thousands of people each day use our world class solutions, which we develop, implement and support.

Our organisation wide solution suite, integrated solutions, and custom designed solutions provide world-class services that are based on leading edge technology and are backed up by a substantial R&D program, providing our customers with a long-term, secure and valuable partnership. TechnologyOne employs more than 700 people and has a presence in seven countries.
