# PlanningXchange

Plan. Track. Assess.

Empower your community to track their development application online, easily access relevant planning rules and lodge applications, at any time. Connect your community with planners and service delivery through seamless integration with your enterprise solution.

Eliminate inefficiencies and delays in the development process by ensuring development applications are accurately managed.

## Overview

PlanningXchange is an online planning solution that streamlines every step of the development planning process. Improve your planning with consistent terminology, processes, systems and a single source of truth.

### **Accessible and consistent planning**

Streamline the creation, management and amendment of all planning scheme data to ensure consistent information is provided to the community. Allow applicants to filter assessment criteria and planning information such as court precedents and policies, applicable to the property.

### **Simplify the assessment process**

Convert your hard copy planning scheme to a single online source. Pre-define assessment criteria in an easy-to-use format, referencing relevant parts of the planning scheme including affectations and third party considerations. Automatically produce the necessary reports, approvals and Council documentation required for a decision to be made.

### **Guide applicants to submit the right information at the right time**

Ensure all aspects of the application such as geo-technical reports, fauna studies and other supporting documentation are identified as part of the complete submission. Guide applicants through the complex planning process, automating and prompting for the information to be submitted at the right time.

### **Provide self-service for application tracking**

Empower community members with 24/7 access to information about the progress of their application, through an easy to use and secure online portal integrated into your website. Registered users can update their existing applications to submit additional documentation such as revised site plans.

Our enterprise software enables access from any device, any where, any time;  
and either on premise or via the TechnologyOne Cloud.

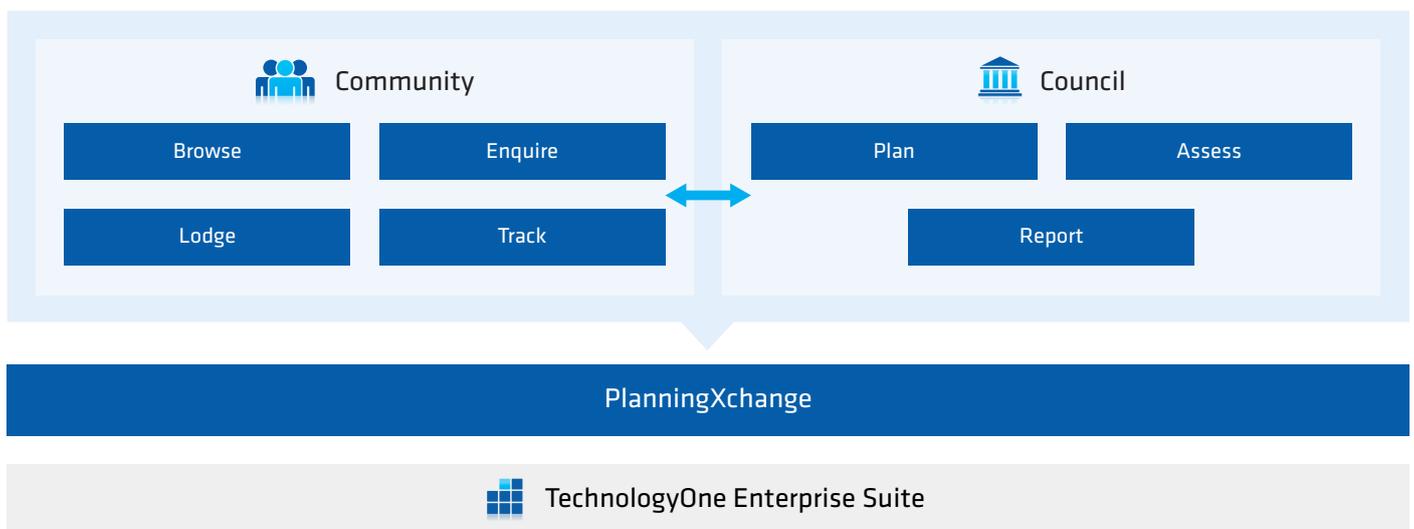

“Planning enquiries over the phone have dropped by over 50% allowing the planning team to focus on processing applications rather than answering simple queries. The service offers the community the convenience of being able to access information on the progress of an application as and when it suits not just when Council’s customer service centre is open.”

Albury City Council, NSW

## PlanningXchange enables you to...

- ✔ Manage your planning process in one place, from planning schemes to customer enquiries
- ✔ Drive a standard planning process with common terminology, formats and outcomes
- ✔ Ensure all assessment items are included, no more missing information
- ✔ Reduce call centre traffic for simple planning enquiries
- ✔ Reduce processing timeframes and paper handling
- ✔ Seamlessly share data with the TechnologyOne suite
- ✔ Eliminate poor assessment processes
- ✔ Free up staff to focus on value-added activities
- ✔ Remove guesswork and apply consistency

# Our approach

## Our enterprise vision

### The power of a single, integrated enterprise solution

Experience the power of a single, integrated enterprise solution built on a single modern platform with a consistent look and feel.

## Market focus and commitment

### Preconfigured enterprise software solutions reduce time, cost and risk

A deep understanding and engagement with our seven key markets means we can deliver to our customers integrated, preconfigured solutions that provide proven practice, streamline implementations and reduce time, cost and risk.

## The power of one

### One vision. One vendor. One experience.

When you invest in a TechnologyOne solution you benefit from a direct relationship with us every step of the way. We do not use implementation partners or value-added resellers. We take complete responsibility for building, marketing, selling, implementing, supporting and running our enterprise solution for each customer to guarantee long-term success.

## The power of evolution

### An enterprise solution that adapts and evolves

Substantial investment into R&D each year means we provide our customers a strong, continuing competitive advantage through an enterprise solution that adapts and evolves by embracing new technologies, concepts and innovation.

## Simplicity, not complexity

### Enterprise software, incredibly simple

Software that embraces consumer concepts and expectations to deliver solutions that are incredibly easy to use and remove complexity.

PAR002-0615

TechnologyOne (ASX:TNE) is Australia's largest enterprise software company and one of Australia's top 200 ASX-listed companies, with offices across six countries. We create solutions that transform business and make life simple for our customers. We do this by providing powerful, deeply integrated enterprise software that is incredibly easy to use.
