We run our own enterprise software for our customers through the TechnologyOne Cloud, taking complete responsibility to provide a simple, cost effective and elastic model of computing.
The future of enterprise software, today

The TechnologyOne Cloud will redefine the way you work, enabling employees to use mobile devices to access key information. This will transform the way you interact with your customers and the community, with immediate productivity benefits.

The TechnologyOne Cloud delivers a massively scalable environment, running our software for thousands of customers with full accountability to each customer.

TechnologyOne is uniquely placed because we own, build and support our software, unlike hosting providers which hand-craft each customer’s environment and simply host third party software in the cloud, with no accountability for the software itself.

TechnologyOne’s enterprise software as a service is the perfect marriage between infrastructure and software delivered through a standard web browser. This simplifies your IT, allowing you to focus on efficiency and innovation in your business.

Enterprise software as a service removes the complexity of managing costly IT infrastructure and greatly simplifies the decision to adopt smart mobile devices throughout the organisation - because this capability is provided as standard from the cloud. This is the future of enterprise software, today.

We make substantial investment each year in R&D to continue to improve our software and cloud service, capitalising on new technologies, concepts and ideas. We pass on the benefits of innovation only achievable through massive economies of scale.

Delivering our enterprise software as a service enables you to be up and running on an enterprise system with less risk, lower cost and shorter time frames. The cloud dramatically reduces implementation time, allowing you to focus on your core business, while we take care of the software and infrastructure.

It’s a simple, flexible and cost effective software as a service model that future proofs your businesses and enables them to embrace an exciting new world of possibilities.

Existing customers using our on premise solution can easily transition to the TechnologyOne Cloud - it is the same software. The data and configuration is simply migrated to the cloud and is ready to go. There are no software re-licensing costs to move to the TechnologyOne Cloud.

Our enterprise software enables access from any device, any where, any time; and either on premise or via the TechnologyOne Cloud.

Simply sign in to get enterprise software as a service.
“Being on the cloud, our users now just need any computer and an internet connection and can run with it. I no longer need to install anything. It means it’s a lot easier for them to access the system throughout their day, regardless of where they are.”

Royal Flying Doctor Service Queensland

The TechnologyOne Cloud enables you to...

- Easily collaborate anywhere, any time and on any device
- Deploy software faster
- Optimise system performance as the business demands change
- Improve security and meet audit requirements with third party attestations for controls, procedures and security
- Meet business continuity obligations with highly available infrastructure
- Reduce environmental impact with improved energy efficiency
- Take advantage of a platform that easily grows with your business
- Reduce total cost of ownership and remove the onus of capital expenditure
- Focus on your core business, not technology

The future is a world built around cloud and smart mobile devices.

Our approach

Our enterprise vision

The power of a single, integrated enterprise solution
Experience the power of a single, integrated enterprise solution built on a single modern platform with a consistent look and feel.

Market focus and commitment

Preconfigured enterprise software solutions reduce time, cost and risk
A deep understanding and engagement with our seven key markets means we can deliver to our customers integrated, preconfigured solutions that provide proven practice, streamline implementations and reduce time, cost and risk.

The power of one

One vision. One vendor. One experience.
When you invest in a TechnologyOne solution you benefit from a direct relationship with us every step of the way. We do not use implementation partners or value-added resellers. We take complete responsibility for building, marketing, selling, implementing, supporting and running our enterprise solution for each customer to guarantee long-term success.

The power of evolution

An enterprise solution that adapts and evolves
Substantial investment into R&D each year means we provide our customers a strong, continuing competitive advantage through an enterprise solution that adapts and evolves by embracing new technologies, concepts and innovation.

Simplicity, not complexity

Enterprise software, incredibly simple
Software that embraces consumer concepts and expectations to deliver solutions that are incredibly easy to use and remove complexity.

Transforming business, making life simple
TechnologyOne (ASX:TNE) is Australia's largest enterprise software company and one of Australia's top 200 ASX-listed companies, with offices across six countries. We create solutions that transform business and make life simple for our customers. We do this by providing powerful, deeply integrated enterprise software that is incredibly easy to use. Over 1,000 leading corporations, government departments and statutory authorities are powered by our software.
