

TechnologyOne ScanWatcher

BaptistCare reaps benefits
with TechnologyOne and
ScanWatcher

“Before using TechnologyOne we had complex and time consuming processes in place. With TechnologyOne and ScanWatcher, we’ve reduced time spent processing and retrieving invoices and improved AP efficiency. The benefits are seen right across the organisation.”

Graeme Mulligan, Chief Financial Officer at Baptist Care (SA)

**Supported
business growth**

“While our revenue has tripled since 2010, we’ve managed to maintain AP staff levels due to ScanWatcher and the resulting efficiency gains.”

**Reduced invoice
queries by 98%**

“EFTPOS integration has really sped up receipting, which is a better experience for our customers. Our customer service team also find it much easier to process payments.”
Jeremy Kemp, Business Systems Coordinator

**Saved time
and money**

“The savings of going paperless extends beyond just the cost of the paper, which can be substantial. Paperless files are easily saved and retrieved, and our client communication is faster and less expensive.”

**Reduced
manual effort**

“Our previous system was complex and extremely inefficient. The new system has reduced manual effort for administrative staff, saved time and increased efficiencies, making the accounting team very happy.”

ScanWatcher enables users to easily bulk scan paper invoices and open the scanned image from the TechnologyOne Financials transaction or reports screen.
