# Business Intelligence

## Information at your fingertips

Gain a real-time view of organisation-wide trends, opportunities and challenges. Generate instant results and make informed business decisions. Effectively monitor KPIs using dashboards with multi-level drill down to transactions.

Consolidate vast amounts of transactional data into relevant, timely and accurate information to make sound business decisions and seize opportunities quickly.

## Overview

Integrate, share and centrally manage data across the entire business. Eliminate information silos and allow data to be queried from enterprise applications, without the complexity of traditional business intelligence solutions.

### **Make informed decisions**

Embed business intelligence in your enterprise solution. Enable decisions using analysis of real-time data, leveraging financial and non-financial information in a single product. Capture your business intelligence data as it is created, providing transparency and accountability across your business.

### **Devolve BI throughout your organisation**

Proactively push information across your organisation with a unique workplace that provides one interface, in one location. Use dashboards tailored to specific roles in the organisation, delivering the right information to the fingertips of the users that need it.

### **Drive company-wide performance**

Break down business silos by bringing all enterprise information into a single place to monitor and improve business performance across all departments.

### **Report in real-time**

Use critical business and operational metrics combined with full integration and drill-down capability to take the right action, at the right time, with immediate results.

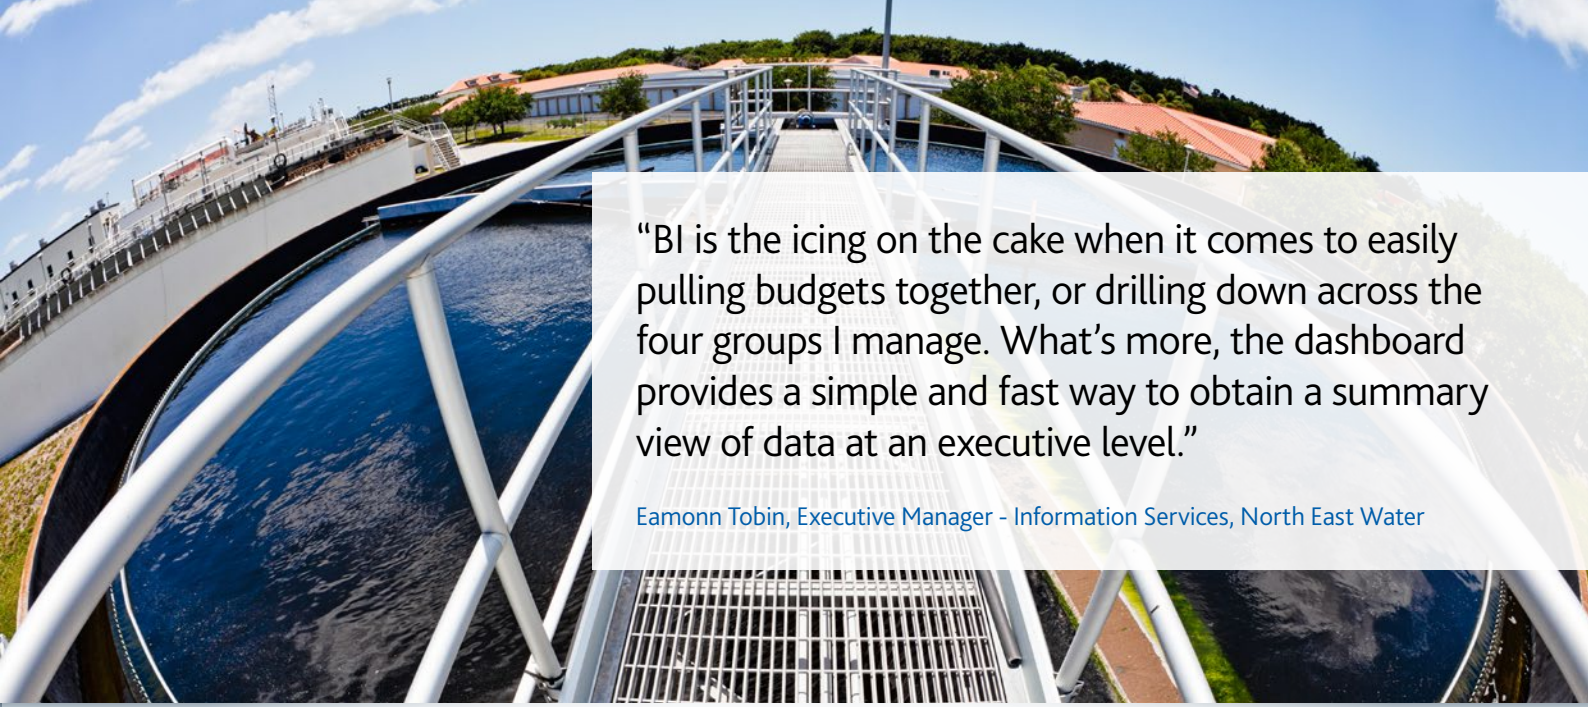

### **Integrate information across multiple systems**

Combine information from both TechnologyOne and external systems to improve reporting. Use TechnologyOne Business ETL to bring in data from external systems to a central data warehouse.

### **Reduce time to realise value**

Quickly implement business intelligence by leveraging existing integration to TechnologyOne products, ease of use, a focus on the business user, and simple third party product integration, for immediate business benefits.

Our enterprise software enables access from any device, any where, any time;  
and either on premise or via the TechnologyOne Cloud.

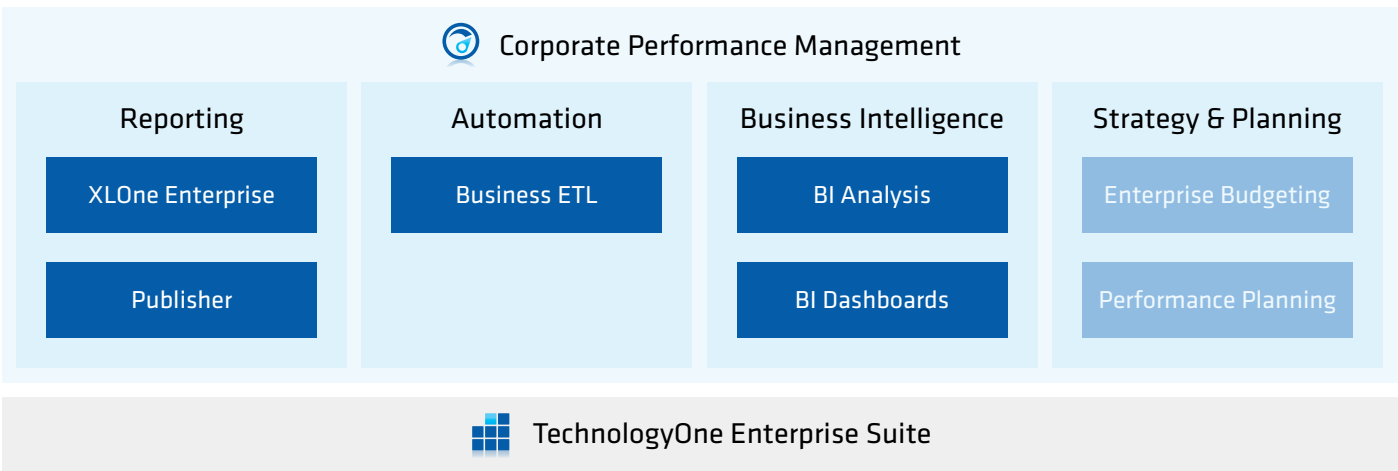

“BI is the icing on the cake when it comes to easily pulling budgets together, or drilling down across the four groups I manage. What’s more, the dashboard provides a simple and fast way to obtain a summary view of data at an executive level.”

Eamonn Tobin, Executive Manager - Information Services, North East Water

## Business Intelligence enables you to...

- ✓ Make strategic decisions quickly to meet time constraints
- ✓ View business performance across all departments
- ✓ Accurately measure workforce performance
- ✓ Deliver comprehensive financial reports

# Our approach

## Our enterprise vision

### **The power of a single, integrated enterprise solution**

Experience the power of a single, integrated enterprise solution built on a single modern platform with a consistent look and feel.

## Market focus and commitment

### **Preconfigured enterprise software solutions reduce time, cost and risk**

A deep understanding and engagement with our seven key markets means we can deliver to our customers integrated, preconfigured solutions that provide proven practice, streamline implementations and reduce time, cost and risk.

## The power of one

### **One vision. One vendor. One experience.**

When you invest in a TechnologyOne solution you benefit from a direct relationship with us every step of the way. We do not use implementation partners or value-added resellers. We take complete responsibility for building, marketing, selling, implementing, supporting and running our enterprise solution for each customer to guarantee long-term success.

## The power of evolution

### **An enterprise solution that adapts and evolves**

Substantial investment into R&D each year means we provide our customers a strong, continuing competitive advantage through an enterprise solution that adapts and evolves by embracing new technologies, concepts and innovation.

## Simplicity, not complexity

### **Enterprise software, incredibly simple**

Software that embraces consumer concepts and expectations to deliver solutions that are incredibly easy to use and remove complexity.

BI005-0314

TechnologyOne (ASX:TNE) is Australia's largest publicly listed software company, with offices across six countries. We create solutions that transform business and make life simple for our customers. We do this by providing powerful, deeply integrated enterprise software that is incredibly easy to use. Over 1,000 leading corporations, government departments and statutory authorities are powered by our software.
