

Business ETL Training

Course Synopsis	
Duration	2 Days
Course Outline	This course provides attendees with an understanding of designing, configuring and maintaining Business ETL (Extract, Transform and Load) solutions and processes.
Attendees	Attendees are expected to be familiar with TechnologyOne financial concepts and ideally some familiarity with XLOne Reporting and System Administration.
Course Objectives	The purpose of the course is to facilitate achieving the following objectives: <ul style="list-style-type: none"> • Design and configure ETL Processes • Design Warehouse Structures
Course Topics	During this course participants will be given the opportunity to learn: <ul style="list-style-type: none"> • Core ETL concepts • Process design • Core processing components • Data Warehousing • User access and process scheduling • Error handling and reporting
Areas not covered in this course	<p>This course does not include processing outside the Financials scope, although the concepts could allow attendees to apply their knowledge to other products. This also does not cover specific configuration for every customer.</p> <p>This course does not include more advanced features of the Business ETL product such as direct SQL queries and connections to external systems.</p>

Business ETL Training
